

Utter Imbecilia

The recent *Executive Order* by President Joe Biden allowing self-identified transgender males to enter shower facilities of females of any age, including girls and children, represents the grossest possible example of stupidity and incompetence imaginable. Can the Office of the President of the U.S. by its betrayal of defenseless females of any age, sink any lower? I defy any critic of my posting to discredit my charge by the rational means that the Left claims to champion. This posting is NOT an attack on the phenomena of transgenderism (**TG**) *per se*, but rather on public officials who fail to ponder, at even an elementary level, about policies which could protect both TG's private considerations AND the safety of every person including females. My Letter to the Editor (below) written five years ago still says it all.

Dear Editor,

The "Madman" in atheist Friedrich Nietzsche's parable by the same name, declared that denial of God leads ALSO to the dehumanization of people too. St. Paul anticipated that very same inevitability in Romans 1:18-32. The rejection of morality isn't the only casualty that results from renouncing God. Other societal foundations are likewise visibly crumbling. For example, assumptions behind the latest bureaucratic drive to remove protective boundaries pertaining to stripping potentially any female of their modesty, violates rationality itself with respect to justice, compassion, logic, and scientific authority. Indeed today's transgenderism agenda is built on a house of cards.

Any so-called "justice" which betrays the protection of girls and women by opening their showers to males cannot withstand the scrutiny of its own rhetoric. Such a travesty of justice instead entails an utter perversion of this heavily-foundational Constitutional term.

What entitles these proponents to label conservatives "intolerant," when it is the former who impose the humiliating costs of their decrees onto defenseless females? While proponents of this agenda claim, and may even imagine, that they speak from "compassion," it is not they who bear the consequences of their absurd decrees.

By what theory of intellectual formation are students required to address TGs with pronouns which in fact contradict one's actual anatomy? The classical goal of education as the pursuit of truth is thereby degenerating into brain-washing, the end of which is ultimately the death of rationality itself.

Finally, the fact that the criterion for determining a person's gender has become a matter of "inner self-identity" irrespective of one's genitalia and genes, indicates that "educators" will even deny *scientific* truth (such as they pretend to defend) insofar as it inhibits their agenda.

Sincerely,

Gary Jensen, Pastor
